VOLUME# 1 ISSUE# 1

Introducing Safety Eyewear & Laser Protective Windows

We now carry our own private label of eyewear as well as laser protective windows. A variety of frame styles and filters are available to choose from. We offer many filters that protect against an assortment of laser wavelengths including, but not limited to, the CO₂, UV, EXcimer, and Nd:Yag.

Laser Safety Eyewear

The safety eyewear has been designed with consideration to both comfort and safety. Many different styles of frames are available, ranging from spectacles to goggles. Filters are offered in either polycarbonate or glass lenses. For our clients wearing prescription lenses, we can provide either goggles to fit over existing glasses, or prescription lenses that are available in a spectacle style.

Laser protective windows are made of acrylic and work well for observation areas, viewing boxes, and equipment cabinets. They allow visual access to laser applications while providing optical protection from dangerous laser light. Standard size sheets measure 24"x 36". However, both smaller custom sizes and oversized sheets (up to 36"x 48") are also available.

Pictures of the frame styles, along with a description of each, can be found on our website. Here, you will also find an eyewear selection chart that works well for determining a combination of the style and filter to best fit your needs.

Laser Protective Windows

Control Laser Script, Signature and Model 612

Cascade Laser provides laser components and accessories for over 75 laser models. Some recent additions to the models we carry include the Control Laser Script, Signature, and Model 612. Entire laser

head assemblies or individual replacement parts are available for all of the laser models we carry.

Some of the individual components we supply include; gold cavities, lamps, flow tubes, lamp clips, etc. In addition, we also supply optical rail components such as laser mirrors, Q-switches, and apertures. Other components, including water pumps and water filters are also available.

A complete listing of the laser head models we carry can be found on our on-line catalog at www.cascadelaser.com. All of the parts and accessories we offer are available from stock, and ready for immediate delivery.

Please contact us to request additional information, or a quotation on any of these items.

Laser Components & Accessories

Our 15 Year Anniversary!

It is hard to imagine it has been 15 years! First of all we would like to say thank you for all of your support. We have formed a lot of wonderful relationships throughout the years, with our vendor base and our customer base alike.

Those of you that have been with us from the beginning have seen a lot of changes at Cascade Laser. We started out like many companies, a one-person business, operating on a shoestring budget. Over the years, we have ramped up and down, ranging from one employee at the beginning of the company, to the six full time employees we currently have. We went from supporting two models of lasers, to supporting over 75 models today. We began the company by supporting a few domestic customers, but now we service several hundred customers domestically and our international sales comprise over 40% of our annual sales!

Over the years, our progress has resulted in five major expansions, the most

recent being the purchase of a new facility in Newberg, Oregon. We are now in a building that is ideally suited to our company, with enough acreage attached to allow us to expand to three times our current size. Newberg is a small town, nestled into the prime wine-growing region of Oregon. It is a beautiful area with rolling hills filled with grape vines, fir trees, and deciduous trees. We are about one hour away from the west coast and we are within one hour of the Cascade mountain range, our namesake.

In addition to laser replacement components, we now offer a full line of laser accessory items as well as a job shop dedicated to laser marking and engraving. Please visit our website to view our new on-line catalogs, as well as our extensive line of laser accessory items and a description of our capabilities in the laser engraving section of our business.

Again, thank you for all of your support in the past and as we continue to grow!
