Lee Laser Models 808 and 812 For Sale

We acquired these lasers a few years back and we have decided to sell them as they are surplus to our needs. Both lasers are basically brand new and have been stored in a heated building since they were manufactured. The model 808 was manufactured in 1994, but has only 80 hours of run time, which was probably the initial burn-in period. The model 812 was manufactured in 1992 and has a total of 580 hours. Both lasers are in perfect condition,

as if they were just rolled off the manufacturing floor.

Both the 808 and 812 are Q-Switched units, so they are both ideal for use in laser trimmers, markers, solder reflow equipment, etc. We would be happy to offer a demo or photo of either laser, on request. The photo shown is not one of the lasers we are offering, but it is representative of the basic Lee Laser 800 Series. If you are interested in either of these lasers, make us an offer!

Lee Laser 800 Series Model

FEATURED ITEM

WATER PUMP ASSEMBLY FOR ESI 3570 SERIES LASERS

We recently made a large purchase of ESI style water pump assemblies. Due to the large quantity purchased, we are able to pass a significant savings onto you. Our normal selling price for this pump assembly is \$570.00, but during the months of September and October, we are offering these pumps BELOW our normal COST. Our sales price, until all of our inventory is gone, is \$375.00!! **Don't miss this one!!**

Water Pump Assembly

Additional Lasers and Laser Systems For Sale
